REPORT OF THE SUPERINTENDENT

I herewith submit the 25th Annual Report of the Bristol County Tuberculosis Hospital for the year ending December 31, 1943.

There were 49 patients in the hospital on January 1, 1943, and 83 patients were admitted during the year, making a total of 132 patients under treatment. The number of patients discharged was 79, leaving 53 in the hospital December 31, 1943. The largest daily census was 60 and the smallest 41, and the average was 50.9. The average length of stay was 245 days. The total number of the hospital days was 18,592.

A total of 132 patients were under treatment during the year and 7 of these were non-tuberculosis.

There were 30 patients who received some form of collapse treatment. A total of 220 pneumothorax treatments were carried out on 21 patients. Phrenic nerve operation was performed on 1 case. Thoracoplasty was carried out on 7 patients with a total of 13 operations. Pneumonectomy was performed on one patient with complete success. No death occurred amongst any patient who received collapse treatment.

Other examinations and treatments were as follows: Laryngoscopies 9; Bronchoscopies 15; Aspirations of chests 12; Incision and drainage of rectal abscess 2; Bladder irrigations 156; Wassermann Tests 17; Blood sedimentations 123; Sputum examinations 250; Urine analyses 1,480.

A total of 312 chest x-ray examinations were made on house cases and 25 on employees. Other x-ray studies 12. There were 658 fluoroscopies.

In the Out-patient department a total of 1,488 visits were made by 903 patients. Of these 226 were follow-up discharged cases of whom 7 received 93 pneumothorax treatments. A total of 832 x-rays were taken in the O. P. D.

The total number of chest x-rays on house and O. P. D. cases was 1,395.

There were 42 extractions, 16 fillings and 13 cleanings carried out by our visiting dentist.

Non-tuberculosis complications were as follows: Diabetes mellitus 3 cases; Rheumatic Heart disease 2 cases; Arteriosclerosis 2 cases; Pregnancy 1 case; Sarcoma of the left femur 1 case; Peptic Ulcer 1 case; Nephrogenic bladder 1 case; Pyelitis 1 case.

There were 21 deaths from pulmonary tuberculosis. These cases were all far advanced at time of admission to hospital. The average length of stay for these cases was 204 days. The length of stay for 1 case was 1,974 days while 7 cases averaged only 14 days of hospitalization.

Rehabilitation

In the past year, through cooperation with other anti-tuberculosis groups of Southeastern Massachusetts, the Bristol County Health Association provided the sanatorium with a part-time rehabilitation worker. Services included reading guidance, craftwork, study, testing and vocational planning, social adjustment and employment guidance.

A total of 65 patients were reached. Of these 12 received study aid or tutoring, 7 testing and guidance, 3 training plans and placement in training. Others were serviced in varying degrees. A full-time program will be supported in the coming year. Expansion of plans will allow increased attention to follow-ups after discharge and to the tuberculous-at-home.

Case Findings

School clinics were discontinued during the past year. In cooperation with the State Health Department, the Bristol County Health Association carried out x-ray surveys in certain industrial plants in the hospital district. Over 1200 employees received chest x-rays through this service. It is expected that this type of survey will be extended in the next year.

Repairs and Upkeep

The largest item of upkeep was the painting of the administration building and the superintendent's residence. The administration building is a frame building with considerable surface to be covered. This painting was put out to bids and the contract was awarded to the Earl Parker Company of Taunton.

Practically the entire outside surface of the administration building was given two coats of white paint. The residence received one outside coat of paint.

Other items of upkeep not let out to contract included, painting of the cottage occupied by the assistant physician and interior painting of

halls and kitchen, and papering and painting of one bedroom at the superintendent's residence.

The ceiling in the front office of the administration building fell down during the year and a new ceiling was put up. A new ceiling was put up in the hall adjoining the main kitchen. Many minor repair jobs to window casings, porches and to furniture were carried out. A new garage door was installed at the garage adjoining the cottage. Repairs were carried out on the roof of the administration building and on the gutters.

A new receiving system (electric pump and receiving tank) was installed in the boiler room after the old one was found on inspection to be beyond repair. Several new traps and one new reducing valve were installed in the heating system.

Farm

Major repairs were carried out on the farm buildings. This work included repairs to roof of the hen house and the main barn. The walls of the hen houses were rebuilt with novelty siding and given two coats of paint. The eaves of the barn were repaired and all wood work was given two coats of paint. Repairs were made to the floors of the barn and a new runway to the main entrance of the barn was constructed.

The interior of the farm house was renovated. Eight rooms were prepared and papered and all woodwork given two coats of paint. Halls and stairways were also prepared and painted and all floors were scraped and varnished. A new ceiling was put up in one room.

Outside repairs were made on the front porch and steps, and new steps built on to the back entrance. Two coats of white lead were applied to the outside of the farm house.

The approximate value of milk, eggs and vegetables sent to the hospital from the farm during the year was \$6,016.24 and cash receipts from the sale of produce and other transactions amounted to \$2,150.47. Total value of receipts was \$8,256.71.

Remarks

The hospital staff was maintained fairly satisfactorily for most of the time. Our greatest difficulty has been in securing employees for kitchen duty and general ward work. During the year one graduate nurse left to join the armed forces and her place has not yet been filled. There are at present two vacancies amongst attendant nurses group.

There has been some slowing up in the surgical work because of the increased demand on the reduced staffs at the hospital where our patients are referred for major surgery. We did, however, have 14 major chest operations carried out during the year and it is doubtful if any patient has been to any disadvantage because of delay or postponement of his operation. Operations of this kind are seldom considered emergencies.

We have been handicapped by lack of single rooms and I trust that sometime in the near future consideration may be given to the building of an addition to the hospital to provide for this need.

The main dormitory on the women's side is badly in need of painting, as are some rooms and hallways, and I recommend that this work be done during the coming year.

Many friends and agencies have been especially interested in the welfare of our patients and have sent books and flowers and presents, and have volunteered to assist our rehabilitation worker in her educational work amongst the patients. We have thanked these people through letters but now extend our thanks here.

We wish again to express our thanks to the clergy who have faithfully visited our patients and attended to their spiritual needs and gave encouragement to them in their fight for health.

To all employees for their loyalty in carrying on at all times even when additional tasks were imposed by temporary help shortage, I wish to extend my thanks.

I know that the trustees are fully aware of the difficulties institutions work under in these times and for their understanding and assistance I extend to them my grateful appreciation.

GARNET P. SMITH,
Superintendent and Resident Physician.
